

EVEREST

A PERFECT BLEND OF PURE SPICES

*A tasty new dish
every day!*

How can Real-Time Information help bring the freshest spices to homes across India & beyond?

For more than 50 years, Everest Spices has helped cooks create tasty dishes with its range of pure and blended spices. As one of India's leading spice brands, Everest Spices strives to run efficient processes to help ensure that prime-quality products reach customers fresh from the factory.

“With the *real-time insights provided by SAP S/4HANA*, we’re able to react quickly to identify and resolve any issues in our supply chain, helping ensure that our products reach customers in optimal condition.”

Mr. Pravin Chine, SAP ERP Head, Everest Spices

How can Real-Time Information help bring the freshest spices to homes across India & beyond?

Everest is India's No.1 spice brand that offers a wide range of whole spices and blends. With over 52 years of experience, Everest maintains the best standards of purity, freshness and authenticity in every pack. Everest's great taste of purity is backed by research, innovation and technology.

Before: Challenges and Opportunities

- Modify the system to add the Ideal plant field and reason for change dropdown can be technically complex and time-consuming.
- Introduce new fields prompts a review of existing processes, creating an opportunity for optimization and efficiency improvements.
- Accurate data and additional approval level minimize errors, leading to improved customer satisfaction.

Why SAP and SAVIC Technologies?

SAVIC has a thoughtfully aligned approach based on Chettinad digital vision and strategic requirements

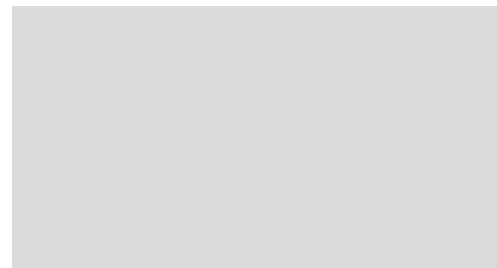

Pillars of our approach:

- Highly experienced & right sized team across SAP S4HANA and all core modules in scope.
- Support AVT with End-to-End Change management, Program management, Governance and Consulting skills to ensure the success of this project.

After Value-Driven Results

- Improved data accuracy, analysis, and decision-making with Ideal plant field and reason for change dropdown.
- Streamlined processes, comprehensive reporting, and increased productivity through integration, leading to enhanced operational efficiency and customer satisfaction.
