

Daily Sales Analytics

SAVIC Apps

Daily sales reports provide an overview of a company's sales activities. This report shows the different trends in sales volume over time, but also analyzes the different steps in the sales funnel and the performance of sales executives. In sales analytics, trends and outcomes are identified and modeled in order to understand and predict them

Product Analysis

The Daily Sales Analytics makes it possible to receive a complete picture of your products and sales and also by visualizing your product and sales data which provides you with a comprehensive "big picture" of the financial health and activity of your business.

Weight Analysis

Analyze the day-on-day sales weight which helps management to make right decisions.

Smart Insights

Better fact-based decision making and improved business performance. Automatically analyze data, revealing key influencers and support what-if scenarios and simulations.

Ordered vs Billed Quantity Analysis

Analyze material wise ordered and Billed Quantity which helps the management in tracking the shortage quantity of each and every material.

Amount Analysis

The Grinding Loss Analytics helps to keep the track of total Input and output produce and while producing how much goods have been lost.

Plant Wise Analysis

Analyze Plant wise various material type and material sales using Daily Sales Analytics.
