

Partner Management System SAVIC Apps

FMCG companies today are staring at a major disruption in their distribution model. Other than some basic technology interventions to track primary & in some cases, secondary sales, very little changed over the decades.

Register Yourself

For a new user to Login, he needs to first register himself in the application by clicking register button on login page. Few basic details like name, address, mobile No. and postal code are to be filled.

Act as Customer

In case you have a need to purchase products/services then as a Customer specify the product, how much quantity you want to purchase, look at the price, any seasonal discounts and additional charges if any.

Packages / Combo Deals

Combo Deals' are another attractive feature of the sale. Customers can get an extra percentage off on buying three products together.

Act as Suppliers

If company has a need to purchase products/services then as a Supplier specify the product, how much quantity can be delivered with time frame, what is the price and additional charges if any.

Apps Easy To Use

SAVIC App Center provides partner apps and services that extend the value of Partner Management App. Mobile Apps can be accessed from any where.

Deployment

Better user experience and easy navigation admin can View and Approve/Reject Quotations/Inquiries, improved analytics with the specific time frame.
