

Scan Post GR SAVIC Apps

One more challenge in enterprises is goods movement. Warehouse/Storage location receives & issues goods either to customers, Vendors, Production, Sub-contracting, or in any other almost on daily. It is very time consuming to the clerk to note down every item & post it in ERP.

Goods Receipt (GR) Against PO

You can open the app with login pin or Biometric (Thumb). Just scan the QR code which consists of PO number, Material, Quantity and Unit of measure.

Quicker and Faster

Noting down entry of goods manually takes huge amount of time. It makes trucks waiting for longer hours outside the gate.

Key Benefits

- No need to purchase any specific Device other than smart phone.
- Clerks smart phone is enough to push the App.
- App can be deployed to multiple devices (phones/tablet).
- Can go for On & Off mode.
- Uses SAP REST API functionality to do this activity.

No Additional Cost

Normally QR Code reader/ RF Gun costs good amount of money and need more devices depending on the size of warehouse or volume or moving goods and these are expensive too.

Apps Easy to Use

SAVIC App Centre provides SAVIC and their partner apps that help extend and boost your business services. Mobile Apps are very easy to use and can be accessed from any Android/iOS smart phone, and Tablet.

Deployment

- Quickly can be deployed at maximum of 3-4 weeks.
- Flexible & competitive pricing based on the option.
- No additional Hardware, Infrastructure, resources required Real-time GR posting.
- System must be enabled to use HTTP & HTTPS proposals
